List of best-selling PC games

This is a list of personal computer games (video games for personal computers, including those running Windows, macOS, and Linux) that have sold or shipped at least one million copies. If a game was released on multiple platforms, the sales figures list are only for PC sales. This list is *not* comprehensive because sales figures are not always publicly available.

Subscription figures for massively multiplayer online games such as *Flight Simulator* or *Lineage* and number of accounts from free-to-play games such as *Hearthstone* are not taken into account as they do not necessarily correspond to sales.

List

Games that have sold or shipped at least one million copies on PC platforms, such as Windows, macOS, and Linux

	Game	Total copies sold	Series	Release date	Genre(s)	Developer(s)	Publisher(s)
1	*PUBG: Battlegrounds*	41 million[1][2]	*PUBG Universe*	December 20, 2017	Battle royale	PUBG Studios	Krafton

Notes

a. Although *Minecraft* was first publicly available on May 17, 2009,[4] and the 1.0 version on November 18, 2011, the first version of *Minecraft* which required a paid account was first publicly available on December 23, 2009,[5] therefore it started accumulating sales in that year.

b. Published by Chucklefish between 2016–2018

c. This release date is for early access

d. This excludes the 1.2 million copies given away as part of Blizzard's *World of Warcraft* annual pass offer.

e. Estimates obtained using a now closed exploit of Steam's achievement system. Only includes Steam sales up to July 2018. Figures are lower bound estimates, as they only include copies that were started at least once. If included in the list, the game was never offered for free on steam before July 2018, as free copies would inflate the numbers.

f. Subscribers are not the same as sales; many Asian markets use a different business model that does not involve retail copies. As such subscriber figures do not equate to sales figures.

g. Of the 13.7 million total units sold by April 2021, 56% were for the PC version.

h. Includes sales of Dark Souls II: Scholar of the First Sin

i. *Final Fantasy VII*:
   - 1998 physical Windows release – 1 million[88]
   - 2013 digital Steam release – 1,136,100[14]

j. Top concurrent player count on Steam. True figure likely higher.
k. Steam sales only. Itch.io sales and free downloads not included.
l. The public alpha was released for free on August 8, 2006; but the paid version on Steam and Itch.io was released on December 6, 2022
m. Sales preceding official Steam release
n. The game was first officially released on October 17, 2018, on steam (labelled as the "1.0 release"). However, between November 4, 2013, and October 17, 2018, it was publicly sold on Ludeon Studio's website as an open pre-alpha/alpha/beta.
o. Early access released in March 2022, but full release in April 2024
p. Early access release in November 2017
q. Sold a million copies under the name of *H1Z1* while in early access. Not to be confused with the *H1Z1* battle royale game by the same company.
